DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 8-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 8 recites the limitation "the heat sink" in line 1. There is insufficient antecedent basis for this limitation in the claim. Claims 9-12 are inherently vague and indefinite since they depend on claim 8.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
5. Claims 1, 5, 6, 7, 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ende.

Ende discloses a device for removably mounting a hard disk drive in a housing comprising a carrier 109 holding a hard disk 10, a heat sink 104 mounted on the carrier 109 and having fins align with respect to a fan which is to be installed in an opening 122, lateral rails (not numbered) for slidably mount the carrier in the housing, a handle 120 mounted on the face of the carrier. Ende discloses the claimed invention except

specifying a memory storage housing the device to be installed into. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to install the disk drive carrier in memory storage housing or any suitable housing since it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

6. Claims 2-4, 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ende in view of Lin.

Ende discloses the claimed invention, as applied to claims 1 and 7, except a fan mounted on the face of the carrier and filter cover and filter removably mounted on the face of the carrier. Lin discloses the face of the carrier having a fan a filter cover and a removably mounted air filter. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to have fan and filter with a filter cover as disclosed by Lin in the structure disclosed by Ende for easy filter replacement.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art listed in the PTO 892 form shows various details of the claimed invention as well as their combinations including disk drive carriage having cooling arrangements.
